Start Pageant

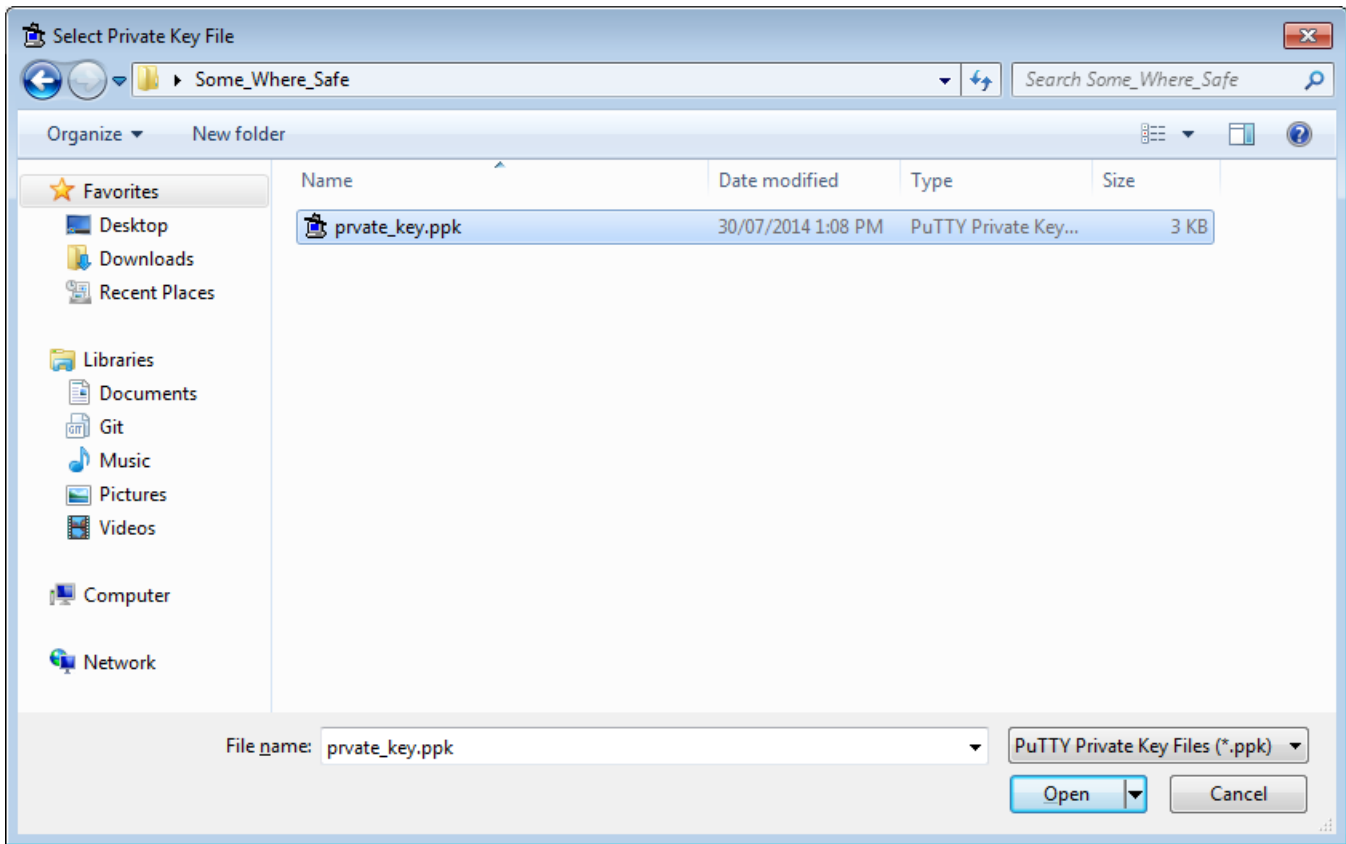

You should see Pageant's icon show up in the system tray at the bottom right of your screen:

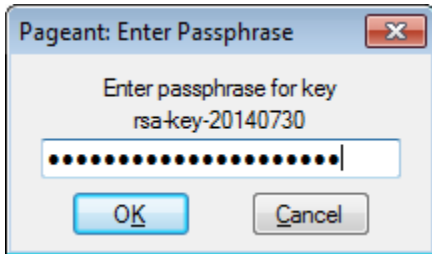

Right click on Pageant's Icon and press the `Add Key` menu item

Navigate to the location where you saved your keys when [generated them](#), select your private key and press the `Open` button:

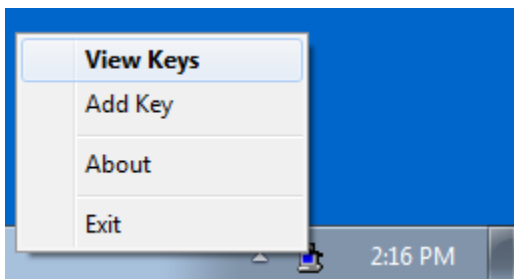

Enter your private key's passphrase:

Verify That Your Key Is Available

Right click on Pageant's system tray icon and press the View Keys menu item:

You should now see your key in the key list:
