

Software availability

The most up-to-date listing of software installed on HPC can be obtained by running

```
module avail
```

on a HPC cluster login node. The listing below may not exactly match the output from the above command at any point in time.

Software provided by RedHat

A	
armadillo	8.600.1
arpack	3.1.3
atlas	3.10.1
autoconf	2.69
automake	1.13.4
B	
bakefile	0.2.9
bash	4.2.46
bc	1.06.95
blas	3.4.2
blas64	3.4.2
blt	2.4
boost	1.53.0
bwidget	1.9.0
